Oregon Retail Sales by County, 1976-1983	17
Oregon Assessed Taxable Valuation by County, 1976-1983	18
Oregon Residential Building Permits Issued by County, 1978-1983	19-21
Map of Oregon	22

PREFACE

The Oregon County Economic Indicators is a compilation of the most commonly requested data for Oregon's counties. It is collected and published annually by the Business Information Division of the Oregon Economic Development Department. The data are used in making comparative analyses among counties, for marketing studies, industrial expansion and relocation decisions, development plans, and labor market profiles.

There are several aspects of the following data that deserve an explanation.

Labor Force Statistics are available only on a labor market basis. Labor Market Areas are county or multi-county areas within which the majority of the residents also work. In Oregon there are three multi-county labor market areas. They are: the Portland Metropolitan Statistical Area (MSA), which includes Clackamas, Multnomah and Washington counties in Oregon, and Clark County in Washington; the Salem MSA, which includes Marion and Polk counties; and the Wasco-Sherman labor market area which consists of those two counties. While Portland MSA data do include Clark County, the Oregon totals do not.

BEA Income Series: The U.S. Bureau of Economic Analysis (BEA) makes annual estimates of county income by major source. In this publication only the primary aggregates, such as per capita income, have been published. Farm, personal, and per capita income are adjusted for place of residence. The figures for total labor and proprietors' income received from manufacturing, non-manufacturing and government sources, and average earnings per job are by place of work.

Oregon Retail Sales: The Census of Retail Trade is taken once every five years by the U.S. Department of Commerce, Bureau of Census. The data published here for 1977 are Census data. Sales and Marketing Management Magazine (S&MM) publishes county estimates for the years in which the Census is not taken. However, S&MM's 1978 estimates were made before the 1977 Census estimates were available. For this reason, the S&MM estimates were too low for 1978. Rather than publishing these figures, the Business Information Division made estimates for 1978 from the 1972 and 1977 Census of Retail Trade data. When the 1984 edition of County Economic Indicators was published, 1982 Census of Retail Trade data were not available.

If you have any questions or comments about this publication, please contact the Business Information Division at (503) 373-1200.
